

## Map of the Proposed Locations at Red Rocks Park & Amphitheatre

This map shows locations #1 (small red rectangle) and #2 (large red rectangle)

This map shows location #3 indicated by the red star.

### **Location #1**

The first prominent location is a natural landscaped area with ground cover and plantings to the east of the Trading Post. This location is fenced on three sides, framing the location but also making accessibility a challenge.

**Location #1**

## Location #2

The second location is north of the lower south parking lots. This is a man-made landscaped area that was recently renovated to include new fencing, retaining walls and a staircase. This location is fenced on all sides, framing the location but also making accessibility a challenge.

**Location #2**

**Location #2**

**Location #2**

### Location #3

A third location is within the Amphitheatre just south of the stage (where the yellow bollard and trash can are located). Artworks(s) in this location are encouraged to be grounded, with minimal attachment to the historic façade and the concrete triangular support. Artwork(s) in this location should not extend or “climb” the wall.
